Subject: I have received the Climax JD

---

“...McNulty Gulch contains 55.06 acres of jurisdictional waters of the United States, including stream channels, wetlands, and springs...”  
.59 acre of wetlands and .4 acre of channels are part of the Mine’s waste treatment system and, as such, these waters are not currently regulated by the Corps...

The Mine has 60 days to appeal the JD.

Let me know if you want to read the JD.
